

puppy guarantee

Health Guarantee Contract

This puppy is being sold as a pet/companion with AKC paper registration. This purebred puppy has received its necessary first 'puppy shot' and has been treated for worms, current to age. First shot date:\_\_\_\_\_ worming dates:\_\_\_\_\_

The buyer is also advised not to take the puppy into public places or allow it to socialize with dogs or other animals that may be unvaccinated until its immunizations are in order. Check with your chosen vet to decide when shots are due. A second 'puppy shot' is due three weeks after the date of the first shot.

The buyer is required to have the puppy examined by their own veterinarian within (48 hours) of receipt to validate the two year congenital guarantee.

The breeder guarantees that after possession of the puppy, a veterinarian states in writing that a congenital health problem EXISTED AT THE TIME OF RECEIPT AND UNFIT FOR PURCHASE, the buyer may: Return the animal and all paperwork for a full refund of the purchase price of the puppy (no refunds are given on shipping costs or vet examinations).This puppy purchased must be returned back to breeder no later than the third day of receipt, which is one day after the time allowed for the vet exam.

The breeder is only guaranteeing against congenital health issues. The breeder does not guarantee against accident, any environmental temperament problems, abuse, neglect, training, and physical problems such as cancer. Nor do we guarantee compatibility with your current pets.

Also, the breeder does not guarantee that a vet will not find evidence of worms, coccidian, kennel cough and parasites because stress of a new home can trigger medical problems that previously lay dormant as parasites can be picked up virtually anywhere.

In the event of the emergence of any congenital defect which is sufficiently serious in the opinion of two qualified veterinarians, one of whom is selected by the breeder, to euthanize the dog or show that the dog is hindered physically to function at an acceptable level,(example: OFA hip score of: poor) the breeder will refund the purchase price or replace the dog with a pup of like kind. It is the breeder's choice to do either.

The buyer agrees to return the signed page of this document along with the receipt of the first veterinarian visit to the breeder within five days of the received date of the puppy or the guarantee will be null and void.
